High School Diploma or GED

REQUIREMENTS

PROGRAM DETAILS

The demand for Medical Scribes in the United States continues to grow, as more and more physicians and health care providers realize the benefits scribes bring to their practice. Traditionally, for every hour that physicians provide direct face time to patients - 2 more hours are spent on Electronic Health Records and other clerical work. A growing strategy to decrease this clerical burden is to use Medical Scribes trained to document patient encounters in real-time. Studies have shown that Scribes improved all aspects of physician satisfaction, including overall satisfaction, physician facetime with patients, time spent charting, chart quality, and chart accuracy.

Since the EHR is at the core of a Medical Scribe's daily job functions, students will gain knowledge of medical clinic workflow systems by engaging and interacting with a Simulated Software Application. Students track a patient from the time the patient calls for an appointment through the entire revenue cycle. The book and software activities included in this program use a building block approach to learning the medical clinic workflow processes. This approach ensures that students are prepared to synthesize and organize medical data into a coherent entry, so that it complies with office protocols, federal regulations, and insurance requirements.

The payment for the MSCE credentialing exam is provided by MedCerts, which when passed grants status as an Apprentice Medical Scribe Professional (AMSP).

COURSES

- PS 1011 Professionalism in Allied Health
- HI 1014 Introduction to Human Anatomy & Medical Terminology
- HI 6015 Medical Scribe Essentials

AT THE END OF THIS PROGRAM, YOU WILL BE ABLE TO:

- ✓ Gain knowledge of medical terminology, disease processes, anatomy and physiology
- ✓ Comply with relevant laws and ethics, the Omnibus Rule, HIPAA, and HITECH
- ✓ Display strong attention to detail and accuracy with use of electronic health records
- ✓ Demonstrate electronic health record documentation as applicable to the clinic workflow
- ✓ Explain how medical coding plays a role and impacts the clinic workflow and revenue cycle
- ✓ Gain an understanding of laboratory testing and pharmacology as applicable to the EHR

ATTAINABLE CAREERS

- Medical Scribe
- Medical Records Specialist
