

IT 2200

IT Network Technician

12 weeks
DURATION

High School Diploma or GED
REQUIREMENTS

PROGRAM DETAILS

This program provides students with the skills and competence to advance their career in Information Technology. Earning Network+ Certification means that the students have the knowledge needed to use and maintain a wide range of networking technologies and validates their proficiency in networking administration and support. Developed by the Computing Technology Industry Association (CompTIA), the program is supported by industry leaders such as Microsoft, Dell, Hewlett-Packard and Novell.

This 12 week program is delivered via Remote Mentored Learning (RML). Students can view the video content from anywhere with a high speed internet connection, and have access to an Online Mentor, who provides ongoing support throughout the program. This program is designed to be completed within a prescribed amount of time, with responsibilities for each course thoroughly outlined in order to pace the program effectively. In addition to viewing video content, students are engaged in skill-building labs and real-world exercises designed to translate what is learned into critical skill-building and preparation for entering a new career.

This multi-sensory learning method allows the student to control their learning schedule, the content covered, and the pace of the training while receiving one-on-one support from a qualified mentor.

AT THE END OF THIS PROGRAM, YOU WILL BE ABLE TO:

-  Manage and troubleshoot a basic network infrastructure, using common ports and networking protocols
-  Understand and apply networking technologies and basic network design principles
-  Install, configure and differentiate between common network devices
-  Install and manage wired and wireless networks, adhering to standards and using modern testing tools
-  Identify and troubleshoot performance and connectivity issues
