

IT 7200

AWS Solutions Architect Associate

10 weeks

DURATION

ISSUING AUTHORITY

Recommended experience w/ cloud platforms OR min. 1 year hands-on IT Network experience

REQUIREMENTS

PROGRAM DETAILS

The IT-7200 AWS Solutions Architect - Associate program is recommended for experienced IT professionals looking to expand in their role, gain more earning power and demonstrate proficiency in cloud computing. As technology continues to evolve, and businesses explore new methods of doing things, it's critical that IT professionals keep pace with this evolution. Cloud computing is not new, but its evolution has accelerated in the last 10 years.

The AWS Certified Solutions Architect - Associate certification proves you can design and implement a distributed architectural solution based on the needs of the end-user. You'll learn about the most important AWS storage, computing, networking, security, database and application services and how to use them.

This program contains two courses related to Amazon Web Services. The first is AWS Essentials, designed as an introduction to the basics of the AWS platform. It is an overview of the AWS cloud and is independent of any specific technical roles. The second course is far more comprehensive and teaches you to design resilient, high-performing, secure and cost-optimized architectures.

Customer Service is a priority in any situation where interaction occurs, so you'll learn the fundamentals by completing the Customer Service Certified (CSC) credential through the Professional Association for Customer Engagement (PACE). You'll also complete training that covers Microsoft Word and Excel. These courses teach strong word processing and spreadsheet skills valuable to business and IT professionals across all industries.

Upon program completion, MedCerts will sponsor the cost of the AWS Certified Solutions Architect - Associate certification exam.

COURSES

- CS 1011 Customer Service Professional- Level I
- IT 7012 AWS Essentials
- IT 7013 AWS Solutions Architect - Associate
- MS 2000 Microsoft Office Series I

AT THE END OF THIS PROGRAM, YOU WILL BE ABLE TO:

- ✔ Define a solution using architectural design principles based on customer requirements.
- ✔ Provide implementation guidance based on best practices to an organization throughout the life cycle of a project.
- ✔ Demonstrate knowledge of how to architect and deploy secure and robust applications on AWS technologies.
- ✔ Learn how service affects the company's bottom line and increase customer retention.
- ✔ Apply methods to organize, calculate and analyze information using Microsoft Excel.
- ✔ Understand how service teams can enhance customer service.
