PROGRAM DETAILS

Start your ASHP Online Training today with the MedCerts' RX-3000 Pharmacy Technician Professional Program and in only 24 weeks you could find yourself a well-qualified pharmacy technician with multiple job offers!

Among the available pharmacy technician online programs, the MedCerts Pharmacy Technician Professional program is ASHP/ACPE accredited and promises to prepare graduates for a career in the Pharmacy sector. Students will participate in a 160 hour Externship Experience at a pharmacy, applying what they have learned through the pharmacy technician online classes in a real-world environment. In addition, the preparation, registration, and costs associated with the Pharmacy Technician Certification Examination (PTCE) administered by the Pharmacy Technician Certification Board (PTCB) is covered by MedCerts.

Hospitals, Pharmaceutical Companies, and Private Practices depend on the expertise of ASHP Certification in pharmacy technicians for the preparation of distributing accurate prescription medication and the delivery of exceptional customer care. The MedCerts' ASHP Pharmacy Technician Program features 24/7 access to the curriculum including video course content, program supplements, and all resources needed for independent study.

As a Pharmacy Technician student, all training materials are provided to help you with exam preparation, regardless of the duration of your personalized program. You will find the MedCerts' Subject Matter Experts are caring, highly trained, skilled, and certified professionals who provide support in the achievement of your success.
